

DOS'UP®

Pipettes and Adapters

Starting from birth, an infant's well-being will be affected by infection, inflammation and other illnesses which may have consequences on the child's development.

Pharmaceutical companies produce medications primarily in liquid form to facilitate intake by infants.

The DOS'UP® Pipette solution provides two major advantages:

- A user-friendly design developed with child safety as priority,
- A simple and precise dosing.

The corresponding product range accessories allow dosing ease and medicine preservation.

Union Plastic is a leader in manufacturing drug administration devices.

Two ranges of **DOS'UP®** and **DOS'UP®PLUS** have been developed for dosing from 2.5ml to 10ml.

Our medical devices are CE certified and made exclusively from pharma grade material.
