GLOBAL EXPERT
FOR HEALTHCARE INDUSTRIES

ANIMAL HEALTH

An international expert recognized from design to the manufacturing of innovative healthcare industry-specific plastic solutions

- 4 production sites operating 24/7

- 20,000 m² of covered space, including 1,000 m² OF CLEAN ROOMS

- 2 billion plastic parts produced each year

- More than 400 injection molds

Union Plastic, certified NF EN ISO 13485 and NF EN ISO 15378, designs and manufactures innovative plastic solutions for human and animal health.

With over 60 years' expertise in the **Pharmaceutical, Veterinary, Medical and Diagnostic** markets, the company draws on its technical know-how in plastic injection molding, and boasts state-of-the-art equipment to meet the needs of markets with demanding applications.

An extensive range of certified high-quality products:

DOS'UP® Dosing systems for liquids or powders

APPLISIL® Local application systems

SPRAYLINE® Respiratory devices

UP'PHARM® Primary and secondary pharmaceutical packaging

MEDIC'UP® Devices for drug transfer, injection and reconstitution

VETIRAL® & VETILINE® Veterinary drug administration syringes

VETIMAX® Complex devices for vaccination and insemination

VETOCIDE® Device for anti-parasitic treatment

Union Plastic is a subsidiary of the international OMERIN Group and benefits from the dynamism of its 1,700 employees

omerin

Eco-Responsible Health Plastics

99%
of waste
recycled

Renewal of the injection molding machines with latest-generation electric presses: power consumption reduced by 30% and noise by 80%

Preserving health and protecting the environment

Benefits of Bioplastic solutions

- Limit the use of fossil fuels
- Reduce the impact of waste disposal at the end of a product's life
- Technical properties comparable to traditional materials
- Materials certified suitable for food contact

Our CSR commitments

- 20% **self-consumption** of electricity thanks to the 3,700 m² of photovoltaic panels installed on our plants
- Supporting our customers in an **Eco-design approach**
- **Reducing and recovering our waste and scrap**
- Sustainable **investments** in our production facilities
- **Developments incorporating product recycling.** Our DOS'UP+® and APPLISIL+® devices are made from 100% Polyolefins for improved recyclability.

Union Plastic's Bioplastic offering

As a plastics manufacturer that is a pioneer in the use of renewable energy, Union Plastic supports its customers in sustainable development by working on **eco-design, waste reduction, lower energy consumption** and the use of new **more sustainable materials**.

We offer our partners a range of bioplastics:

• **Organically sourced products**

Based on natural fibres such as maize starch, Polylactic acid and PBS

• **Biodegradable**

Under industrial conditions in a recycling centre

For each application, our design office validates the specifications and conditions of use.

Your partner
to bring your new projects to life

Innovation

*More than 30 concepts proposed each year.
Our design team works in partnership with your R&D and Marketing
departments to jointly develop the concepts of your future products.*

We integrate
all forms of expertise
in a qualified system,
from initial analysis of your
requirements to validation of pilot runs:

- Needs and risk analysis
- CAD, Computer-generated image
- Rheological studies
- Mock-ups
- Internally created prototype molds
- Material source selection
- Validation of pilot runs

- Co-development
of your products and consumables
- Qualification of
manufacturing processes
- Integration of
existing tools

Development

*Union Plastic possesses a dedicated development team comprised of
project managers, developers and metrologists.*

Industrial excellence

The manufacturing of Union Plastic products is secured by four Back-Up production sites: Three in France and one in Tunisia.

Optimised automated or manual assembly

*More than 25 automated lines with robots.
Creation of complex products containing up to 12 parts*

Our cutting-edge clean room production lines (ISO9 - ISO8 - ISO7 areas) cover an area of 20,000 m² to meet all your needs in terms of reactivity, flexibility and results.

Plastic injection molding and injection-blowing

More than 100 injection presses

FULL SERVICE*

- LASER & OFFSET printing
- Customised labelling or packaging
- In-house EtO sterilisation

*More information on p.59 of the catalogue

Manufacture of prototype molds and integrated maintenance

Strategic file confidentiality

Optimising performance and tool guarantees

Quality, the backbone of our organisation

Uncompromising quality

our quality system conforms to GMP* and has, for several decades, ensured that our productions are compliant, providing you with guarantees of safety and hygiene.

ISO 17141 and ISO 14644-1 for contamination and environmental control

* Good Manufacturing Practice

Control

- 3 metrology laboratories
- 300 managed control appliances

US DRUG MASTER FILE (DMF) No. 36044

Medical devices concerned:

- **DOS'UP®** measuring cups
- **DOS'UP®** dosing syringes
 - **DOS'UP®** Spoons
- **DOS'UP®** and **DOS'UP+®** pipettes
 - **APPLISIL®** applicators

NF EN ISO 15378:2018 NF EN ISO 13485: 2016 0459

Regulatory expertise

- Management of medical device registration, CE marking, and UDI traceability (MDR compliance)
- Delegation of controls
