

Carbon Footprint Report 2019–2024

FRAMEWORK AND METHODOLOGY

Scope of the analysis: Scope 1 & 2

The study examines the implementation of all direct and induced activities carried out by the company over a full period of operation.

Analysis period
2019 - 2023 - 2024

CARBON FOOTPRINT

Summary of results for Scope 1 & 2 emissions

Year	tCO ₂ e
2019	559,85
2023	442,51
2024	334,34

CARBON FOOTPRINT

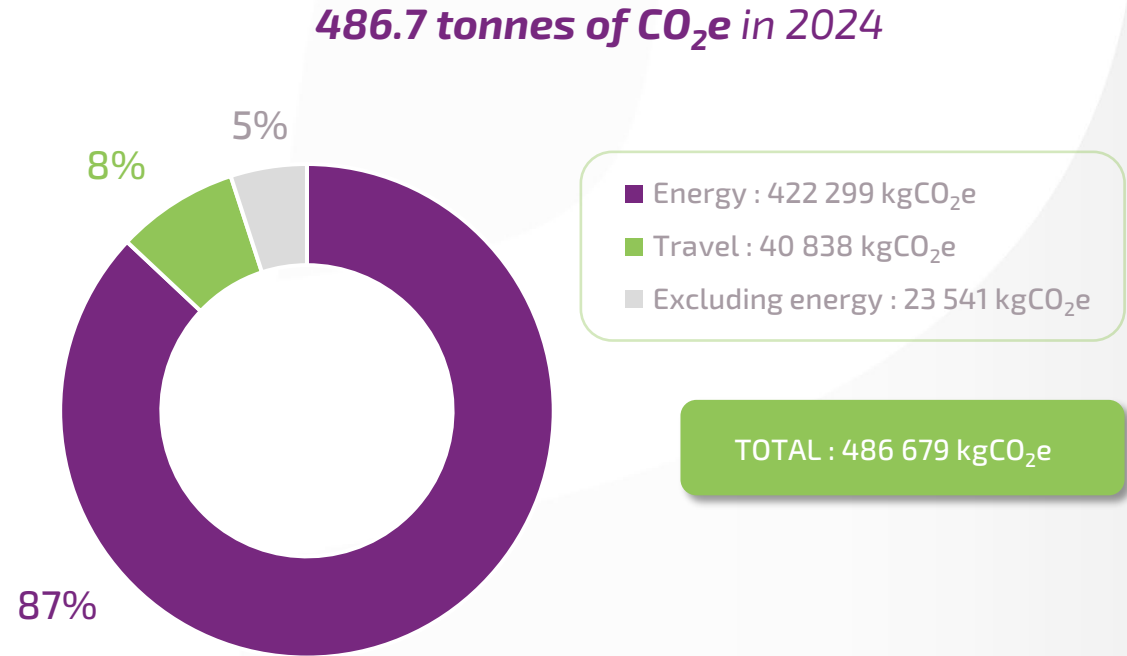

Distribution of emissions by year (Scope 1 & 2)

- Replacement of 55 hydraulic presses with electric presses
- LED lighting installed across all industrial sites
- Installation of solar panels covering 3,750 m²
- Optimization of cooling units with heat recovery systems.
- Replacement of the vehicle fleet with electric vehicles.

Distribution of emissions by sector (across all Scopes)

The main source of greenhouse gas emissions is the energy sector.
